

6600 Series Frame

Easily move your forks anywhere across your wide frame with Arrow's 6600 series telehandler frames.

Open face shaft support allows for tilting the frame forward, offering the shaft bar to slide, making it simple and easy to pass the forks through the supports and place your forks anywhere across the frame.

Heavy duty 1.5" thick open face shaft supports exceed capacity regulations giving the frame a 12,000 lb capacity.

Built to fit most makes and models of telehandlers.
