

MINI EXCAVATOR BUCKETS

Arrow's Mini Excavator Buckets are built for jobs that demand more from compact equipment. Designed for durability, versatility, and efficiency, these buckets handle everything from trenching to cleanup with ease. With features that make switching applications simple and construction that stands up to tough conditions, they help keep operators productive and machines working longer.

18" Bucket

24" Bucket

30" Bucket

36" Bucket

Options Available

Features and Benefits

- » Bolt-on teeth allow operators to switch from aggressive digging to smooth trench finishing as needed
- » Bolt-on side cutters provide added cutting performance while protecting bucket edges in tough conditions
- » Multiple coupler options available including the Quick Attach Coupler with 1.25" pin for fast, secure installation across multiple machines
- » Welded wear straps reduce abrasion in high-wear areas to extend overall bucket life
- » Heavy-duty top tube reinforces the bucket structure for added strength under load
- » Available in 12", 18", 24", 30" and 36" widths to match a variety of machines and applications
