

HYDRAULIC SKID STEER FORK POSITIONER

THE ULTIMATE **ALL-IN-1** FRAME SOLUTION

Versatile “All-in-One” Frame

- » **Dual Functionality:** Use the frame as a standard skid steer frame or convert it into a fork positioning frame.
- » **Effortless Conversion:** Transition from standard to fork positioning in just a few steps:
 - » Lift the kit into the frame.
 - » Install and tighten 4 end bolts & 4 bracket bolts.
 - » Attach the jump hoses.

Superior Serviceability

- » **Convenient Maintenance**
 - » Remove the fork positioning kit from the frame for open and accessible servicing.
 - » Eliminate the hassle of working in tight spaces within the frame.
- » **Minimized Downtime:**
 - » Quickly swap out parts or fittings by replacing the kit entirely.
 - » Use the frame as a standard skid steer frame during repairs for uninterrupted operation.

Standard ITA Fork Compatibility

- » **Fork Pocket Design:** Works seamlessly with standard ITA Class 2 forks, 4-5" wide — no need for special forks with welded lugs.
- » **Easy Fork Adjustment:**
 - » Place the forks into the pockets.
 - » Secure them in position with the stop block for a locked, reliable fit.
